

Our Parking Brands

CBD GARAGE CONSTRUCTION WORK BEGINNING JUNE 23, 2021

Attention Parkers:

The CBD Garage will be undergoing concrete repairs and waterproofing improvements. The work is expected to begin on or about **June 23, 2021** and continue through the end of the year. The work is being done on the exit ramp from the Roof Level to the Ground Level, the ramp and parking areas between the 1st and 2nd Levels and in the stair towers.

Generally, the work will be performed Monday through Friday between **7:00 AM and 5:00 PM**. There will be occasions when night and weekend work will be required.

The garage will generally remain open during this work. However, drive aisles may be temporarily reconfigured, parking may be restricted in the general vicinity of where the work is being performed and stairs towers may be closed. When the work is being performed in the stair towers, two stair towers, including one with an elevator, will remain open at all times during construction.

While the work is being performed on the exit ramp, traffic will not be allowed to use portions of the ramp. Temporary two-way traffic patterns will be established to allow patrons bypass the portions of the ramp where work is on-going and to exit the garage. ***Please pay careful attention to temporary signage and traffic control devices when entering and exiting the garage.***

There may be times during construction that the garage will be closed to accommodate specific construction activities. Advance notice will be given of any garage closure.

Please use caution and a reduced speed while traveling through the garage while this work is being performed.

We apologize for the inconvenience and thank you for your cooperation and patience.
