Lead Poisoning
Prevention Week
October 22-28, 2017

- Get Your Home Tested
- Get Your Child Tested
- Get the Facts

- Children become lead poisoned by:
 - ▶ Putting their hands or other lead-contaminated objects in their mouths,
 - ▶ Eating paint chips found in homes from peeling or flaking lead-based paint, or
 - ▶ Playing in lead-contaminated soil.
- Lead Poisoning in children can cause:
 - ▶ Damage to the brain and nervous system
 - ▶ Learning and behavior problems
 - ▶ Slow growth and development
 - ▶ Hearing and speech problems
 - ▶ Headaches

The Malden Redevelopment Authority offers financial assistance to income eligible homeowners to de-lead their properties.
